# PERFORMANCE TEST ENGINEER

**Fintech | Software Solutions**

Join our versatile team as a Performance Test Engineer! Embarking on a role with Bitventure presents an exciting prospect for new candidates. With substantial growth in recent years and promising future expansion, we offer a vibrant and dynamic environment. Our team is comprised of experts in various technology stacks and provides excellent support system for professional development. Transparency and open communication in our development work foster a collaborative culture, while regular knowledge-sharing sessions enrich learning experiences. The exposure to cutting-edge technologies, including cloud computing and microservices, ensures that employees are at the forefront of industry advancements.

## WHY BITVENTURE?

At our core, we are driven by a powerful vision; to foster sustainable businesses by mitigating risks and boosting revenue. We are the catalyst for innovation and proudly embody the spirit of "Intelligence in Action". Our recent accolade in 2023, the Digital Transformation Award at Africa Tech Week, speaks volumes about our commitment to excellence.

## WHAT'S IN IT FOR YOU?

Enter an environment where success is not just encouraged, but inevitable. As a Digital Transformation Industry leader, we offer career growth opportunities as we continue to scale and innovate. Experience a diverse and collaborative team, with competitive remuneration and recognition for your contributions.

## WHAT ARE WE LOOKING FOR?

- Matric, relevant degree or diploma in the IT field.
- ISTQB certified – performance testing is a plus.
- C# code skills a plus
- 3 + years of experience.
- Agile, with a focus on driving continuous improvement in line with best practice and industry trends
- Testing Techniques, Manual Testing, Regression Testing, Test Case Design, API Testing, Performance Testing, Security Testing
- Scripting and Coding
- Defect Tracking
- Database Skills
- Version Control Systems
- Excellent communication skills (verbal and written).
- Strong Analytical and problem-solving.
- Attention to detail and accuracy in defect reporting.
- Collaborative mindset and ability to work in a team environment.

## WHAT YOU WILL DO

- System Management - Develop tools and utilities to automate manual operational tasks in production environments, improving efficiency and reducing manual errors
- Test Planning - Define, compile, and manage the test plan and test schedule, ensuring alignment with project scope
- Test Case Design - Create and maintain test documentation, including test plans, test cases, and test reports
- Test Execution and Defect Reporting - Execute test cases to validate software functionality and identify defects. Track, analyse, and manage defects throughout the testing lifecycle.
- Regression Testing  - Conduct regression testing to ensure seamless integration with existing features
